Relevant Work Experience

TheBookingNinja.com   San Francisco, CA
Company Coder   Mar 2017 - Present
Booking Ninja is a startup dedicated to handling clients in the tourism industry's online bookings and operations 24/7. We handle 40+ clients in over 6 states, spanning various time-zones. Additional to my role as an agent, I am the company's only coder. Using JS, HTML, Bootstrap, & the Talkus.io API I built and maintained all of our clients' booking portals from the ground up. I also developed a branded slack-integrated app for handling the company's incoming call notifications.

Eugenio Piñeiro   Rincón, PR
Personal Assistant   Jun 2016 - Jan 2017
Mr. Piñeiro is the U.S. Commercial Commissioner for the International Commission for the Conservation of Atlantic Tunas (ICCAT). As his personal assistant I worked with local private fisheries, local and federal policy makers and researchers. A very rewarding hands-on experience in the intersection of public environmental policy and private enterprise.

SBS/MegaTV   Guaynabo, PR
Avid Editor   Apr 2015 - Jun 2016
Responsible for the transcoding and final cut of the archive footage show *La Bóveda del Gangster* with Tony Sánchez. Worked on my own self-directed workflow to produce 7 weekly broadcast-ready episodes.

RGB Broadcast & d(sign)age Inc.   Hato Rey, PR
Tech-evangelist for Edius 8   Dec 2014 - Apr 2015
In addition to administrative duties for d(sign)age, I worked as the company's software education resource for Edius 8 and the Grass Valley line of products. Led a weekend course for the news editing staff of *WKAQ-TV* covering the latest software updates and workflow integrations.

Education

Fullstack Academy of Code: WDF   New York, NY
A 13-week immersive web development and software engineering fellowship sponsored by the NYC Tech Talent Pipeline. Has an acceptance rate of 2.5%.

Loyola University of New Orleans   New Orleans, LA
Bachelor of Arts in Philosophy

Skills

Windows/OSX/Linux Compatible
Comfortable w/ Test-Driven & Agile Dev
Proficient:
   HTML, CSS + Javascript (ES7)
   Node + Express
   SQL, PostgreSQL, Sequelize
   React, React-Redux
   Ajax/Axios
   Webpack
   Git
   Jasmine/Mocha/Chai (TDD)
Knowledgeable:
   NoSQL, Firebase
   SCSS
   React-Native
   TensorFlow.js
Some experience:
   Ruby, Python
   Xamarin
   Mongo
   Enzyme (TDD)
Human Languages:
   español   (native speaker)
   english   (native speaker)
   français   (conversational)
   italiano   (novice)

Current Projects

MIME   www.mimeframe.com
A minimalist wireframing app that uses machine learning to help you draw your app idea. Runs on a NERD stack with a SQL database and websockets. Features a custom-built TensorFlow model for shape prediction.

Jerga   codebase available on github
A Spanish language database for slang regionalisms with map visualizations for each country.
